

Beautiful. Affordable. Durable. Bishop brings them all together!

The products within our Modern Material offerings are one of the fastest growing segments in the market. Today, there are numerous decorative materials that beautifully replicate many paints and stains. In addition to their attractive appearance, the use of these materials is also driven by other desirable features:

- **Affordability** – Modern Materials are usually less expensive than painted or stained doors.
- **Durability** – Choosing Modern Materials means your doors will last longer than wood. They are more resistant to heat, scratches, shattering, water damage and warping.
- **Finish Integrity** – The finishes offer a uniform appearance without the grain variations of natural wood. The doors will not fade like paint and stain naturally do over time.
- **Cleanliness** – These materials are stain-resistant and easier to clean. Most of our doors have anti-microbial benefits built into the finish. This treatment creates a protective barrier on the surface reducing the spread of microorganisms harmful to human health.
- **Sustainability** – Engineered wood cores are better than carbon neutral as more carbon is sequestered than expended during manufacturing. And our Modern Materials replace rare woods. Using these materials can open LEED opportunities.

The Bishop Program offers three finishes in three door styles.

Bookmatching is not available.

Slab Doors

The slab door design is the most popular Modern Material door style. Bishop has invested in state-of-the-art equipment that allows us to make beautiful slab doors. The typical turnaround is 4-6 weeks on the stock colors below. We can also source additional colors, but minimum orders, generally higher costs, and longer lead times apply.

Textured: *Natural textured surface with high decorative level*

Muratti 4

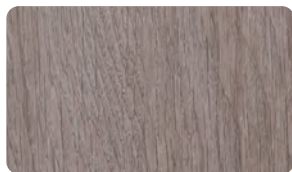

Ida 2

Como Ash 2
